FOR IMMEDIATE RELEASE

Streamline Health to Provide Business Process Management Solutions to Leading Texas-Based Pediatric Hospital

Top 10 Pediatric Hospital Implements Streamline Health BPM Solutions to Automate Mission Critical Processes to Drive Higher Productivity and Enhance Legal Governance

Cincinnati, Ohio – August 20, 2009 — Streamline Health Solutions, Inc. (NASDAQ Capital Market: STRM), announced today that one of the best pediatric hospitals in the nation, as designated by U.S. News and World Reports, has implemented the first of several Streamline Health Business Process Management (BPM) workflow solutions. With a need to eliminate labor-intensive paper processes and to achieve greater overall operating efficiencies, this institution chose BPM technology solutions by Streamline Health tailored to the hospital's specific business processes. The initial deployment offers compliance assistance to the Human Resources Department providing easy access and monitoring of information associated with the entitlement of the Family Medical Leave Act (FMLA).

“Streamline Health’s BPM solutions will be instrumental in driving better productivity and higher accountability in the key business processes of this institution,” said J. Brian Patsy, president and chief executive officer of Streamline Health. “Our long history of healthcare market expertise and our ability to design and implement workflow processes tailored to the institution’s specific needs were critical factors in their decision to utilize our BPM solutions. We believe that their staff will be able to seamlessly utilize the new technology to drive operating efficiencies throughout their entire system. This is the first of a number of workflow implementations that we will install at this site and we look forward to working closely with this institution for many years to come.”

Mr. Patsy continued, “This initial implementation will simplify the hospital’s labor intensive paper processes. FMLA processing entails particularly complex and detail oriented procedures that require constant oversight in order to effectively serve all parties to the transaction. With Streamline Health’s BPM solution medical institutions can efficiently monitor FMLA entitlement by eliminating outstanding requests, reduce data entry and automate employee data access to help finalize FMLA requests with version control capability. This is an important step forward in enhancing customer service, satisfaction, and operating efficiencies.”

Additional BPM workflow solutions expected to be implemented in this leading pediatric hospital in the coming months include: Invoice Routing, Certification Reimbursement, Tuition Reimbursement, Status/Change (Life Events), Performance/Compensation, and Refund Approvals.

About Streamline Health Solutions, Inc

Streamline Health is a leading supplier of document workflow and document management tools, applications and services that assist strategic business partners and healthcare organizations to improve operational efficiencies through business process optimization. The Company provides integrated tools and technologies for automating document-intensive environments, including document workflow, document management, e-forms, connectivity, optical character recognition (OCR) and business process integration.

The Company's workflow-based services offer solutions to inefficient and labor-intensive healthcare business processes throughout the revenue cycle, such as chart coding, abstracting and completion, remote physician referral order processing, pre-admission registration scanning and signature capture, financial screening, perioperative processing, Recovery Audit Contractor (RAC) mitigation processing, secondary billing services, explanation of benefits processing and release of information processing. The Company's solutions also address the document workflow needs of the Human Resource and Supply Chain Management processes of the healthcare enterprise. All solutions are available through a Software as a Service (SaaS) model of delivery via the Company's Remote Hosting Center that better matches customers' capital or operating budget needs, or via a locally installed software licensing model.

Streamline Health's solutions create a permanent document-based repository of historical health information that is complementary and can be seamlessly integrated with existing disparate clinical, financial and administrative information systems, providing convenient electronic access to all forms of patient information from any location, including secure web-based access. These integrated solutions allow providers and administrators to link existing systems with documents, which can dramatically improve the availability of patient information while decreasing direct costs associated with document retrieval, work-in-process, chart processing, document retention, and archiving.
